

KICKING HORSE DAM: WHAT HAPPENS NEXT?

Construction, Water Management & Supporting Projects

PROJECT TIMELINE

MANAGING WATER DURING CONSTRUCTION

Kicking Horse Feeder Canal → Temporary Bypass System → Ninepipe Feeder Canal → G Canal

SUPPORTING PROJECTS

CROW PUMPING PLANT

The Crow Pumping Plant helps move water where it is needed within the irrigation system, providing greater operational flexibility and supporting irrigation deliveries throughout the Mission Valley. The facility will be an important part of water management efforts during construction of the Kicking Horse Dam Modification Project and will continue to provide long-term benefits for future operations.

WILD PLUM BOAT LAUNCH & DAY-USE FACILITY

Recreation access and public benefits.

CROW CREEK WETLAND MITIGATION RESERVE

Wetland and habitat restoration.

Confederated Salish & Kootenai Tribes
Natural Resources Department
Division of Engineering & Water Resources (DEWR)
